● OBJECTIVE

A mobile developer with 5+ years of experience and 10+ apps shipped to the App Store and Google Play, now focused on native iOS with Swift and SwiftUI. I like turning real problems into clean, reliable products, and I do my best work when I can own a feature end to end. I'm applying to the Apple Developer Academy to sharpen my craft in native iOS and design thinking, and to build things that matter alongside people who push me to grow.

● EXPERIENCE

Dealjava

Jul 2023 – Present · Full-time · Remote

iOS Developer · Oct 2024 – Present

Develop and maintain native iOS apps in Swift — building iOS-specific features, fixing bugs, and keeping every release App Store-compliant; still use Flutter for merchant-facing apps when cross-platform support is needed.

Mobile Developer · Jul 2023 – Oct 2024

Built cross-platform apps in Flutter with Bloc & Stream across the full SDLC: set up git workflows and project structure, integrated thermal printers over Bluetooth and wireless, built offline support with Hive & GraphQL, and managed Play Store releases with unit testing.

PT. Rakhasa Artha Wisesa

Oct 2021 – May 2023 · Jakarta

Mobile Developer → Team Lead

Started as a junior building cross-platform apps with Flutter and integrating Firebase, Midtrans, and Google APIs. Grew into team lead, coordinating 3 developers and owning code quality across the SDLC, while exploring native iOS in Swift and Xcode.

CatatMak

Apr 2024 – Feb 2025 · Remote

Mobile Developer

Developed and maintained a personal-finance app in Flutter for both Android and iOS — implementing features, handling regular fixes, and managing deployments to the Play Store and App Store for a smooth cross-device experience.

PT. Satu Visi Raya (SAVIR)

Mar 2024 – Aug 2024 · Hybrid

Mobile Developer

Built and maintained the company's mobile app in Flutter, often working independently alongside designers and backend engineers. Applied clean architecture and consistently delivered features on tight deadlines, through to release on the Play Store and App Store.

Freelance · Upwork & Diraya Tech ID

Oct 2020 – Present · Remote

Software Engineer

Help clients ship secure, scalable mobile apps end to end. Delivered 10+ products across health, education, finance, and tourism — including Pradini (premature-baby care), Syarihub (private online Quran lessons), a dual customer/courier food-delivery system, and a crypto news portal.

● EDUCATION

B.Eng, Informatics Engineering

STMIK Widya Utama

Aug 2023 – Jun 2027 (expected)

Computer Software Engineering

SMK Telkom Purwokerto

Jun 2018 – May 2021

Independent Study — Machine Learning

Asah, led by Dicoding

Aug 2025 – Feb 2026

● CERTIFICATIONS
